

Data Sheet Loka® Long Distance Magnetic

Product description

Application

The Long Distance Magnetic label is a hardy printed label with a magnetic back.

This label is compatible with every metallic surface.

This label is compatible with any commercially available metallic rack.

With this label an additional retro reflecting inner layer is used.

This label is designed for use where scan distances are long or when lighting conditions are not optimal.

Due to the magnetic back, this label's function is extremely flexible. It is perfect for circumstances where regular adhesives fail, such as in cooling or freezing cells.

Dimensions

Many variations are possible depending on the printing, with the following limits:

Limits:	Min. Height	15	mm
	Max. Height	100	mm
	Min. Length	20	mm
	Max. Length	350	mm

The dimensions depend on the amount of information necessary, character and barcode height and lay-out.

Colours

Default label colours:	Yellow	Default print colour:	Black
	White	Additional print colours:	Red
			Green
			Blue

When choosing the colours, ensure that there is sufficient contrast between the label and the print. For this type of label Jeka expressly recommends a black print. A functional test before ordering, to ensure the label is fully functional under specific circumstances, is also recommended.

Specifications

Magnet layer

Magnet:	Flexible magnetic foil
Liner:	N.A.
Thickness:	0.5 mm
Adhesion on steel:	> 43 g/cm ²

Carrier

Material:	Hard PVC
Inner layer:	Retro-reflecting foil
Thickness:	0.36 mm

Top layer

Material:	Polypropylene foil
Thickness:	0.02 mm

Weight

Total weight:	2260 g/m ²
